In re Baird

In view of the public hearing held on the standard of nonobviousness under 35 U.S.C. § 103 and written comments received pursuant to the hearing, the Commissioner of Patents and Tradmarks has reconsidered the Office's March 22, 1994 Notice, entitled "In re Baird," published in the *Official Gazette* on April 19, 1994 (1161 O.G. 314). The notice is hereby withdrawn.

The determimation of the patentability of claims to a species within a prior art genus is highly fact dependent. Thus, patent examiners are instructed to analyze such claims on a case-by-case basis. See, for example, *In re Baird,* 16 F.3d 380, 29 USPQ2d 1550 (Fed. Cir. 1994); *In re Bell,* 991 F.2d 781, 26 USPQ2d 1529 (Fed. Cir. 1993); *In re Jones,* 958 F.2d 347, 21, USPQ2d 1941 (Fed. Cir. 1992); *Merck & Co. v. Biocraft Labs.,* 874 F.2d 804, 10 USPQ2d 1843 (Fed. Cir.), *cert. denied,* 493 U.S. 975 (1989); *In re Susi,* 440 F.2d 442, 169 USPQ 423 (CCPA 1971); *In re Lemin,* 332 F.2d 839, 141 USPQ 814 (CCPA 1964); *In re Rosicky,* 276 F.2d 656, 125 USPQ 341 (CCPA 1960).

Comprehensive guidelines will follow relating to what evidence is necessary to establish and to rebut a *prima facie* case of obviousness in a case involving a genus-species relationship.

Assistant Secretary of Commerce and Commissioner of Patents and Trademarks

Reference Collections of U.S. Patents and Trademarks Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information in various formats from the U.S. Patent and Trademark Office. Many PTDLs have on file all full-text patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PTDLs have both the patent and trademark sections of the *Official Gazette of the U.S. Patent and Trademark Office*. The full-text utility and design patents are distributed numerically on 16 mm microfilm, and plant patents on color microfiche. Patent and trademark search systems on CD-ROM (Compact Disc-Read Only) format are available at all PTDLs to increase utilization of and enhance access to the information found in patents and trademarks. It is through the CD-ROM systems that preliminary patent and trademark searches can be conducted through the numerically arranged collections.

All information is available for use by the public free of charge.

In addition, each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials. Facilities for making paper copies of patent and trademark information are generally provided for a fee.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
